SUMMARY

Results-driven Senior QA Engineer with over 3 years of experience in automation testing, Agile QA, and DevOps integration. Demonstrated success in optimizing regression cycles and enhancing automation coverage through scalable test frameworks. Proficient in Selenium, Playwright, TestNG, and Jenkins, with a strong focus on AI-driven quality analytics. Dedicated to aligning technology with business objectives to drive continuous improvement and product excellence.

EXPERIENCE

Software Test Analyst

Software & Support Media - Entwickler academy

2024 - 2025 Berlin, Germany

Managed complex Software testing applications with a focus on timing, functionality, and cost efficiency.

- Spearheaded end-to-end mobile testing initiatives for iOS and Android applications using the Appium framework, ensuring enhanced app stability and user experience.
- Developed and maintained robust automation frameworks with Selenium and TestNG for web applications, significantly reducing manual testing effort and improving release efficiency.
- Integrated automated test suites into CI/CD pipelines using Jenkins, supporting continuous testing and faster feedback during development cycles.

Software Test Engineer

Cognizant - Travelers Insurance

2021 - 2024 Chennai, India

Assisted in software testing tasks, including planning, execution, and status updates communication.

- Developed automation frameworks with **Selenium**, **TestNG**, and **JUnit** for enterprise apps, ensuring reliable test execution.
- Worked on **Guidewire Policy Center** and **ClaimCenter** applications, performing manual testing and backend data validation to ensure policy and claims accuracy.
- Enhanced end-to-end test coverage by integrating API and backend validation through **Postman** and **ReadyAPI**, ensuring consistency across web and service layers.
- Designed and executed functional, integration, and regression test cases for key Guidewire modules including Policy, Billing, and Claims, ensuring end-to-end coverage and compliance with business workflows.

PROJECTS

Strategic AI Governance for Risk-Aware innovation : Embedding McKinsey's Responsible AI framework into corporate Compliance architecture - Thesis work

06/2025 - Present Berlin, Germany

- To identify and analyse the key risks and governance challenges related to corporate AI adoption.
- To evaluate the principles and strategies within McKinsey's Responsible AI Framework that support risk-aware innovation.

LANGUAGE

English

Native

German

Advanced

SKILLS

Automation

Selenium, Playwright, TestNG, JUnit, ReadyAPI, Postman

QA Methodologies

Test Planning, Agile, Shift-Left Testing, Continuous Testing, Risk-Based QA

Programming Language

Java, Python, C#, TypeScript

DevOps and Tools

Jenkins, GitHub, Git, Docker, AWS, CI/CD pipeline

Test Domains

Regression, Web, API, Integration, Accessibility, Performance

Data and Reporting

JIRA, Rally, Power BI, Excel, Dashboard analytics

CERTIFICATIONS

Microsoft & LinkedIn: Generative AI for Productivity – 2024

Google Cloud: Generative AI Foundations – 2024

.NET & C# Automation Project – Uniq Technologies – 2022

EDUCATION

MBA in IT Management

IU Internationale Hochschule

07/2024 - 12/2025 Berlin, Germany

Bachelors of computer science

Guru Nanak College

06/2018 - 05/2021 Chennai, India

KEY ACHIEVEMENTS

Saved 20+ hours per sprint via CI/CD QA pipeline integration.

Automated over 150+ test cases leading to 80% faster regression cycles.
